

Martin Walker, author of the book, *Skewed*, states - "By dismissing the anecdotal evidence of communities, individuals, soldiers and workers exposed to low level pollution, health authorities, medical practitioners, medical institutions and insurance companies are abrogating their responsibility to public health, content instead to allow industry to dictate health standards that do not reflect the reality of peoples' lives or even contemporary scientific knowledge."

All speeches are in layman's terms presented
by physicians and qualified experts.

PRESENTATIONS (recorded in the following order)

Everything you need to know about preventing health problems caused by mold, pesticides, your furnace, your child's school environment and more are presented in a compact, easy to understand format.

Jeffrey J. Moyer: Vice President ONFCI:

Welcome; Introduction; Question & Answer
Instructions

Kathleen Fagan, M.D.; MPH: Perils of Pesticides *Pests Aren't the Only Ones Who Should Worry!* Learn how you may be causing some of your own health problems.

Kathleen Fagan, M.D., MPH: Mold, Mildew and You - *Signs, symptoms and chronic health effects of mold exposures in home and work settings.*

Stuart Greenberg, Executive Director, Environmental Health Watch: Decreasing and Eliminating Moisture and Mold/Fungal Exposure in the Home.

James (Jim) LaRue, Residential Construction Consultant: Repair and Improvement Strategies for Maintaining a Healthy Home.

PRESENTATIONS (continued)

Presentation of the ProtectoZone, MCS Accommodation Prototype: ADA-OHIO Award to Playhouse Square Foundation and John Hemsath, Director of Theater Operations.

Charlie Reid: KEYNOTE SPEAKER:

Board Member Ohio Hamilton County Board of Health - An Ounce of Prevention in a

Pound of Cure World; Is Anyone Looking Out for You?

Jeffrey J. Moyer: Original song

Jim Davis: HVAC Specialist, Trainer, Consultant: Is Your Furnace Contractor Killing You?

Jill Swensen, AIA, LEED; Mike Preston, AIA:

The Built Environment and Its Effect on Education. *Is your child's school building causing health problems? How performance, achievement, and behavior are affected; what can be done.*

"These CDs are great tools for educators, physicians, lawyers, chemical injury sufferers, health boards, air quality representatives, care givers and anyone concerned about poor air quality"—

-Toni Temple: President, ONFCI
